1. ANTECEDENTES E OBXECTIVOS	5
2. RELACIÓN DE ESTRADAS MUNICIPAIS	7
3. PLANO DE SITUACIÓN DAS ESTRADAS MUNICIPAIS	9

1.- ANTECEDENTES

1. ANTECEDENTES E OBXECTIVOS

Na enquisa de infraestruturas da Deputación de Ourense, se catalogaron unha serie de vías de conexión entre poboacións ou de acceso a diversas propiedades, sen manter o criterio de estrada.

Na lei 4/94 de 14 de setembro de estradas de Galicia define no seu artigo 2 as estradas do seguinte xeito:

“Para os efectos desta lei considéranse estradas as vías de dominio e uso público proxectadas e construídas fundamentalmente para a circulación de vehículos automóbiles, nas que o itinerario non se desenvolva integramente en solo cualificado como urbano polo correspondente instrumento de planeamento urbanístico, coas excepcións que poidan derivarse do disposto respecto das redes arteriais.”

Polo tanto nesta relación de estradas incluiremos só as infraestruturas que permitan a circulación en ambos sentidos de automóbiles e non estean na súa totalidade construídas sobre solo urbano ou de núcleo rural. Non consideramos estradas:

- As vías non pavimentadas
- As vías con menos de 3 m. de ancho de firme e 3,5 m. de plataforma
- A rúas dos pobos, que está integramente dentro do núcleo

Con este traballo tratamos de determinar a lonxitude total da rede municipal de estradas municipais, por concellos, na provincia de Ourense, aportando neste primeiro estudo os seguintes parámetros das vías:

- Código e denominación
- Lonxitude e cotas
- Situación da vía
- Anchos de firme e plataforma
- Localización dos treitos urbanos

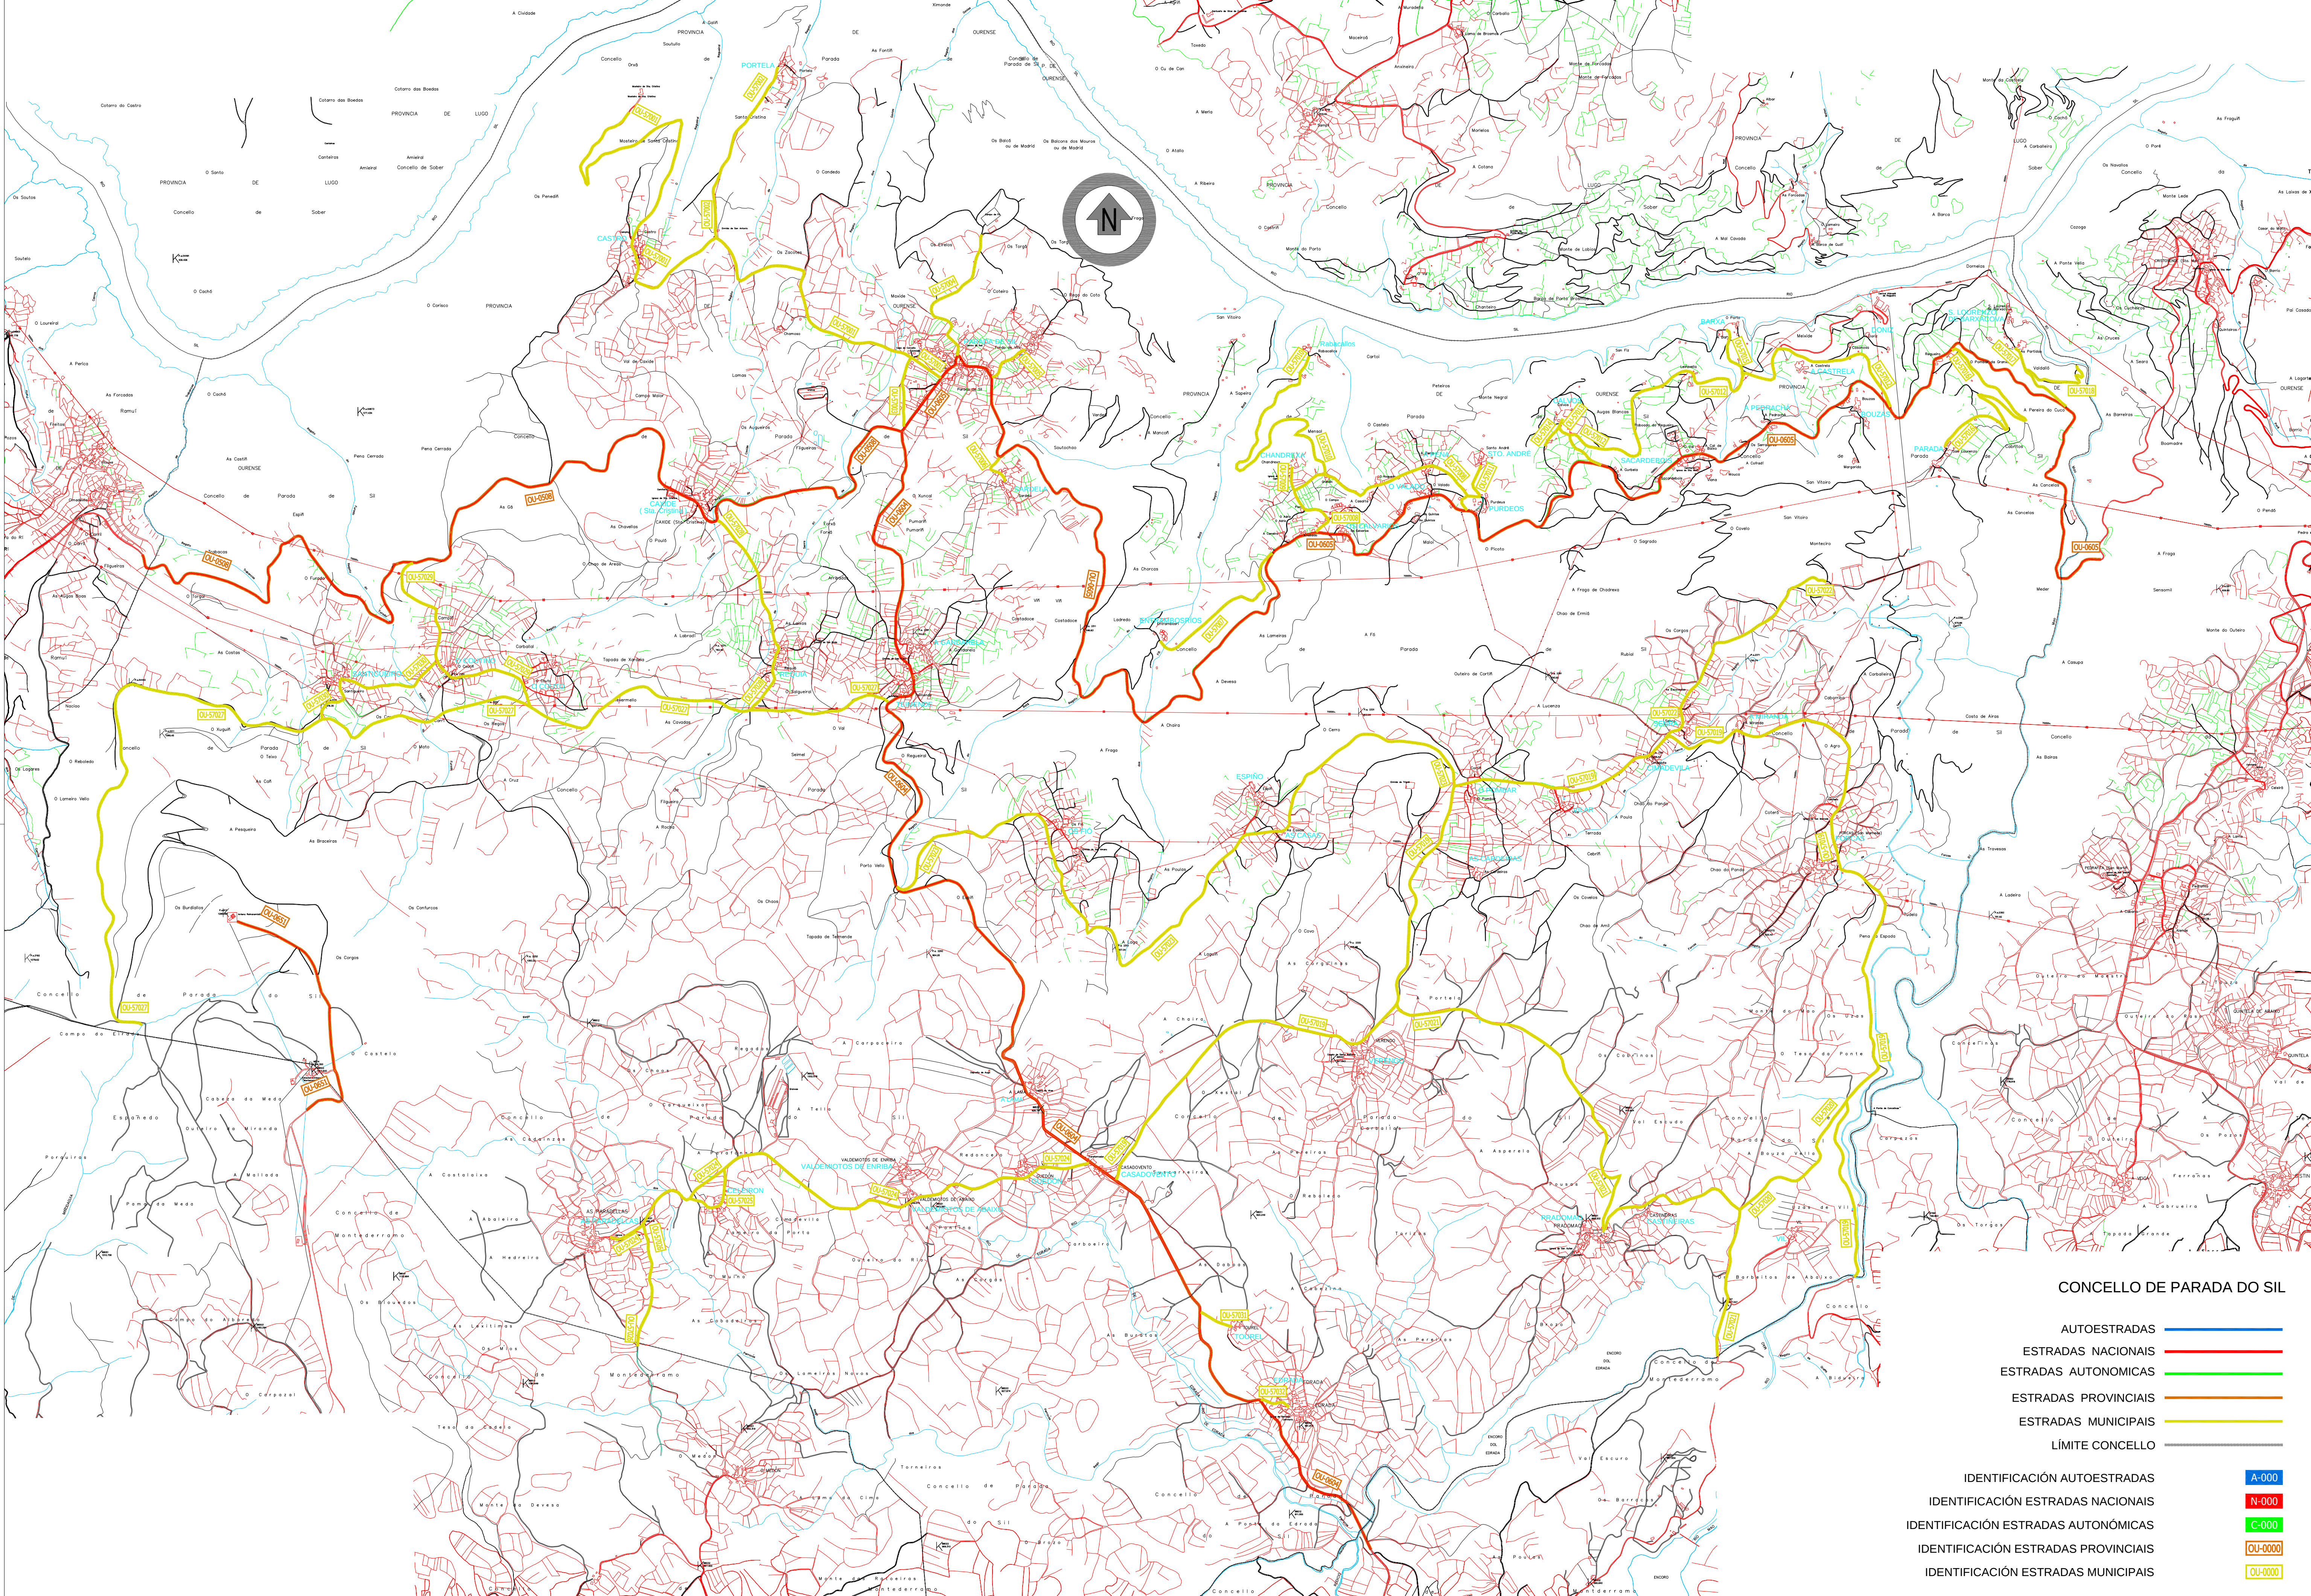

2.- RELACIÓN DE ESTRADAS MUNICIPAIS

2. RELACIÓN DE ESTRADAS MUNICIPAIS
